Forecast for Wednesday 18 May 2022

Weather: A few showers are likely early on Wednesday morning but these will mostly clear by mid morning. Bright or sunny spells are expected to develop for most ranges and dry for most of the rest of the day. Cloud will increase later in the afternoon as a band of rain to the west of Scotland begins to progress inland and this will affect the hills later in the evening.

Chance of cloud-free hill tops above 800m: 70% increasing to 90%, low cloud in the morning will clear during the morning.

Low cloud and visibility: Scattered cloud 6-800ft in the morning associated with any showers will lift and clear to leave only patches of lower cloud. Visibility will become moderate or poor for a time in any morning showers but later in the day it is expected to be very good. Through the evening visibility will deteriorate as rain moves over the area later.
